

2 New Products from **RatioTek™**

Part # RT™ A11-PR

Part # RT™ A11-PRX

**These valve body kits are the only products you need!!
Kits fit Allison 1000 and 2000 Models from 2011 through 2015**

Valve Body Kit Features

Improves shift firmness with different spring selections to achieve desired results. Improves Converter holding power.

Patent Pending pressure relief and boost system

Easy to Install - Great Results

A better way of shifting gears.™

RatioTek™

15902 A Halliburton #272
City of Industry, CA 91745
626-968-2754 Fax 626-961-8563

RT™ A11-PR

For the every day truck. Kit sets minimum pressure and boosted pressure to levels that are a match for stock 400HP and up to 800HP levels adjustable within the kit.

Good News - Customers will say the engine runs better after installing this kit. This is because De-fueling under torque management will be eliminated. The trans will have enough holding power to allow full fuel delivery.

Rebuilding this trans without using this kit is a serious mistake.

Steve Younger

RT™ A11-PRX

Kit sets minimum pressure and boosted pressure to levels that are a match from 800HP up to 1200HP or more adjustable within the kit.

This kit is for racing, tractor pulls and chipped out monster trucks.

Flash!!!

RT-A-ES now included in these kits.

RatioTek™

A better way of shifting gears.™

**RT™ A01-PR fits Allison 1000 and 2000 series
from 2001 to 2010 models**

RT™ A01-PR

Improves Converter clutch holding power. Sets pressure levels to match increased engine torque.

After years of testing and evaluation with hundreds of transmissions the amount of pressure that can be run without causing rapid ring wear is where this spring sets pressure. Kit comes with a shim to match extreme power levels.

**Helps protect the C1 clutch
against burn up with customers
that love to do 4 wheel drive
burnouts.**

Flash!!!

RT-A-ES now included in this kit.

Part# RT-A-ES

Professional Calibration Kit.

Installation Instructions

Fits: Allison 1000 Series 2001 & Later
Higher calibration shift valve springs

Sticking E shift valve can cause code P1711 or P0872.

Shift Valve Body

Install new White springs on shift valves.

Bore Cleaning
Hacksaw slot in break line tubing. Then insert strip of 180 grit wet or dry sand paper. Spin by hand in bore removing high spots. Check by freezing body half hour. If valve is free it will work in the truck.
