

2 New Products from RatioTek™

Part # RT™ A11-PR

Part # RT™ A11-PRX

**These valve body kits are the only products you need!!
Kits fit Allison 1000 and 2000 Models from 2011 through 2019**

Valve Body Kit Features

Improves shift firmness with different spring selections to achieve desired results. Improves Converter holding power.

Patent Pending pressure relief and boost system

Easy to Install - Great Results

A better way of shifting gears.™

RatioTek™

8987 E. Tanque Verde Rd#309-264
Tucson, AZ 85749
626-968-2754 FAX 520-367-5047

RT™ A11-PR

For the every day truck. Kit sets minimum pressure and boosted pressure to levels that are a match for stock 400HP and up to 800HP levels adjustable within the kit.

Good News - Customers will say the engine runs better after installing this kit. This is because De-fueling under torque management will be eliminated. The trans will have enough holding power to allow full fuel delivery.

Rebuilding this trans without using this kit is a serious mistake.

Steve Younger

RT™ A11-PRX

Kit sets minimum pressure and boosted pressure to levels that are a match from 800HP up to 1200HP or more adjustable within the kit.

This kit is for racing, tractor pulls and chipped out monster trucks.

Flash!!!

RT-A-ES now included in these kits.

RatioTek™

A better way of shifting gears.™

**RT™ A01-PR fits Allison 1000 and 2000 series
from 2001 to 2010 models**

RT™ A01-PR

Improves Converter clutch holding power. Sets pressure levels to match increased engine torque.

After years of testing and evaluation with hundreds of transmissions the amount of pressure that can be run without causing rapid ring wear is where this spring sets pressure. Kit comes with a shim to match extreme power levels.

**Helps protect the C1 clutch
against burn up with customers
that love to do 4 wheel drive
burnouts.**

Flash!!!

RT-A-ES now included in this kit.
